PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Ussuriysk Barracks South-Southeast is located approximately 5 kilometers (km) south-southeast of Ussuriysk (Figure 1). A rail transloading point approximately 4 km from the barracks serves the Ussuriysk Ammo Storage Depot South [] the barracks area, and associated training facilities.

The installation comprises approximately 1,100 acres and has a total of 64 buildings, including 4 barracks, 1 administration building, 4 general storage buildings, 16 general support buildings (8 of which are possible officers quarters), 5 vehicle maintenance/storage buildings, 7 possible ammunition storage buildings, and 12 support buildings. Approximately 12 additional support buildings are scattered throughout the area (Figures 2 and 3).

A training area is located approximately 5 km south of the barracks area. This area comprises a possible ammunition storage site, a probable field encampment area with an exercise track, a small figure-8 for driver train-

ing, a suspect maneuver and field problem area, 3 small support buildings, and a possible automatic or antitank range. Heavy trackage parallels the main highway from the installation to the encampment. A possible AAA practice site is located approximately 2 km southeast of the barracks area.

This installation has been covered by [] missions of interpretable quality. There has been no appreciable change in the installation since initial coverage in [] [] Winter coverage in [] indicates little activity at the barracks area and no activity at the training site.

Analysis of the area suggests that the installation is probably used as a summer field training site for a line unit.

Ussuriysk Barracks and Maneuver Area Partizan [] reported at 43-92N 131-59E is not considered to be a self-sustaining installation, but rather a detached element of the Ussuriysk Barracks South-Southeast.

DESCRIPTION OF INSTALLATION

Railroad Service

The installation is served by a rail transloading point located approximately 4 km from the barracks.

Road Service

The installation is served by a probable hard surface all-weather road from Ussuriysk.

Aircraft Landing Strip

An airfield is located approximately 1 km northeast of the barracks area but is not integrated with this installation.

Administration and Troop Housing Area

Area D contains 1 administration building, 4 barracks, 3 general storage buildings, and 7 support buildings.

General Storage

Possible general storage is scattered throughout the installation.

Ammunition Storage Areas

Area F (not shown on Figure 3) contains 7 buildings and is possibly secured ammunition storage for the training area. Ussuriysk

Ammo Storage Depot South [redacted] described in a separate report, is located in this area.

ing area and contains 1 building with an elevated section.

Other Buildings

Area H contains 16 general support buildings and appears to be associated with the bivouac area (R1). Eight of the buildings are possible officers quarters. An additional 12 buildings are scattered throughout the installation.

Flat Trajectory Firing Range

Area P (not shown on Figure 3) has 1 apparent firing point. The approximate distance to the possible impact area is 1,000 feet.

Artillery Emplacements (Batteries)

Area Q (not shown on Figure 3) is a possible AAA practice site with 8 firing positions.

Equipment Storage/Maintenance Areas

Area J1, separated into 2 areas by a road, contains one 80- by 30-foot vehicle maintenance/storage building, 2 support buildings, and 2 motor parks -- one 160 by 275 feet and one 185 by 400 feet.

Infantry or Combined Arms Field Training Area

Area R1 is a possible bivouac area probably associated with the storage and quarters area (H).

Area J2 contains two 115- by 30-foot probable vehicle maintenance/storage buildings, 1 general storage building, 2 support buildings, and one 185- by 160-foot motor park. Heavy trackage is visible into this area from several directions.

Area R2 (not shown on Figure 3) is a probable field encampment area and contains a small figure-8 driver-training exercise track, a possible automatic weapons or antitank firing range, a possible field maneuver area, and 3 support buildings. Trackage and scarring are evident throughout the area.

Athletic Field

Area K (not shown on Figure 3) is a probable exercise track associated with R2.

Unidentified Facilities or Tracking Activity

Area T consists of unidentified ground scarring.

Driver-Training Area

Area M is a wheeled-vehicle driver-train-
